

Simplex Time Solutions

For when time counts

The Simplex Time story

In 1894 a young engineer called E.G. Watkins patented a time recorder that he had invented for his employer. Little did he know it would become the cornerstone of a global business that would still be setting industry standards well over a century later.

After setting up on his own, Watkins' business grew steadily and employed over 150 workers by 1942. His son Curtis Watkins took over and further expanded the business into a strong and diversified global organisation. Simplex Time Solutions was acquired by Tyco International in 2001 and has continued on an upward path, providing the world with the most technologically advanced products for time, fire alarm and monitor-control equipment.

Today, Simplex Time Solutions continues this fine tradition of quality products and services throughout Australia and around the world.

Simplex Time Solutions

End-to-end time and attendance packages

Our TimeStar® time and attendance products offer big time solutions for small business budgets, making it easy to collect, store and manage staff hours and pay. From fast and easy hardware for clocking in and out through to automated payroll administration software, we offer flexible end-to-end solutions for all types of small to medium sized businesses, helping you to manage your largest business cost - staff.

Our advanced software and biometric solutions are both smart and flexible to meet Australia's diverse workplace conditions. Simplex TimeStar® solutions are simple to install, easy-to-use and proven to save you time, money and headaches when it comes to payroll, time and employee record administration.

Master Clock Systems

Whether you are seeking a master time system for a hospital or university, a unified time solution for an airport or railway system, or a synchronized time and attendance system for your manufacturing operations, Simplex Time Solutions can deliver the solution you need. We handle applications of every size and description, from systems with a few indicating clocks to those with 1,000 or more. If you want fully synchronized fire, security, communications, voicemail, time and attendance and central monitoring, we can supply that too.

Time Displays

You want the time? Simplex Time Solutions has the answer. Non-regulating clocks for small business environments. High tech, synchronous corrective time displays. Functional indoor and durable weatherproof outdoor solutions. Stylishly customised, handbuilt tower clocks for some of Australia's most iconic buildings. Australia's only minute impulse clock that corrects itself every hour for sensitive operational environments where time accuracy is paramount. Talk to us about your specific needs.

Support and maintenance

We are here for you. With sales and service offices located nationally, Simplex Time Solutions are here for you when and where you need us.

In addition to an experienced mobile technical service team, we offer a dedicated online support helpdesk, online user guides and full telephone support to assist you promptly with any questions or concerns.

We also offer terminal testing, performance optimisation and onsite repairs including full replacement of hardware if required. Comprehensive 12-month maintenance contracts are available as an option for larger or more complex installations.

For more urgent assistance, our emergency replacement service is available within metropolitan areas during business hours and includes labour and travel expense. When you partner with Simplex Times Solutions, you have the peace of mind that comes from dealing with an expert and industry leader.
